

York County Stormwater Consortium BMP Reporting Tool

User's Guide Addendum

Reporting on a project with multiple BMPs at the same site.

This addendum provides an example of a report from a project with multiple BMPs on the same site. If your project contains multiple BMPs, you will need to **submit a report for each BMP associated with a project, even if they are located on the same site.**

- + “Add New Project” for each BMP in the BMP Reporting Tool (<http://york.cicapps.org>) and name the projects consistently (for example: York County Parking Lot Upgrade-01; York County Parking Lot Upgrade-02)
- + For New Projects, estimate nutrient and sediment load reductions for each BMP individually in BayFAST (www.BayFAST.org)
- + List the nutrient and sediment load reductions and total project cost for each BMP individually in the BMP Reporting Tool (<http://york.cicapps.org>)
- + Submit multiple reports or proposals—one for each BMP

All other information in the YCSWC BMP Reports for BMPs located at the same site can be the same. Please refer to the User's Guides for complete instructions.

New Proposal

York County Parking Lot Upgrade-01

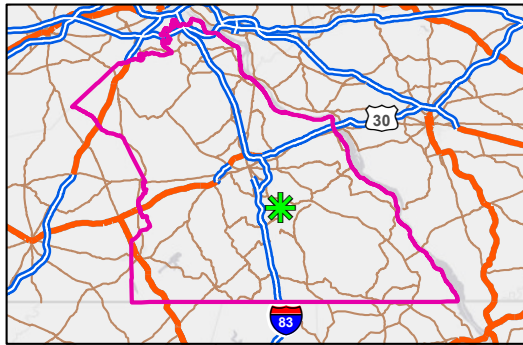

Bioretention/Rain Garden

York

General

Ownership:	Both
Secured funding	No
Secondary benefits:	No
Designs:	Yes
Project area (acres):	1.57
Length (ft):	N/A
Cost (\$):	15000

Location

Longitude	-76.65247
Latitude:	39.8909
Publicly accessible:	Yes
Impaired:	Yes
NPDES permit req:	No
HUC 12:	020503060602

Description

This is a multiple BMP project to upgrade a parking lot in York County.

Pollutant Reduction Information

Nitrogen reduction (lbs/yr):	26
Phosphorus reduction (lbs/yr):	0.3
Sediment reduction (lbs/yr):	268
Total pollutant reduction (lbs/yr):	294.3
Cost (\$) / lb:	50.97
